US Dept of Veterans Affairs 5
Agency for the Damned
Aka – *VA stop murdering our veterans with drugs & suicide.*

US Dept of Veterans Affairs for veterans is a total cluster and Mind-Fuck.

There is a US, veteran suicide epidemic in America that has been ongoing for well over 9 decades. It was a denied & hidden epidemic until recently. While no longer hidden, Americans, their National Socialist government and the US Department of Veterans Affairs remain in denial. Until high profile veteran suicides shattered the nations glass house denying this country's shame in not providing needed care for active military, veterans ***and their families***. The true unsung, invisible heroes are active duty military and veteran families. It is they who care for the soldiers and veterans not VA. That sorry govt agency plagiarizes and steals their credit and due, as it does everything else. For example, VA and civilian authorities record veteran suicides as 'other causes' hiding this inconvenient truth. In rare cases, doing so helped the surviving families collect life insurance because suicide is not covered by it. If cause of death is suicide, the exemption clause in all life insurance policies refuses to pay a claim. Same as burning down one's insured property, which is considered fraud and not covered. In veteran suicide the fraud belongs to this country and to VA, which was again not covered – up until now. That is one glaring reason for soaring wrongful death lawsuits against VA, well overdue and rightly so. Why should Americans on the whole continue to pay for Washington DC's & VA's murderous sins? However, even in these rare circumstances the cover up is cause of the epidemic hiding veteran suicide from national notice. In doing so, the barbarity continues to get worse while criminal culprits behind it grow richer and more emboldened at accomplishing their many, mini-genocides. I underwent and lived through this experience at VA. The agency is responsible for an ongoing epidemic using drugs and psychiatric abuse to carry out what amounts to criminal, psychological warfare experiments on US veteran populations. The bureaucracy uses them as lab monkeys in Veterans Affairs training hospitals and clinics. Until a recent US Supreme Court decision allowing class action and tort lawsuits by veterans and their families against VA, it has committed and still commits with impunity Nazi style mass torture and murder on living human beings. Crimes hiding evildoing filling national and private grave yards to the brim with dead bodies. America if you do not recognize with a slight twinge of outrage at the national shame in that, then you and this sorry nation truly are lost beyond all redemption. WW2 did not defeat the Nazis; that cult simply moved to America and set up corporations as VA and BIA to continue performing monstrous atrocities on living humans, dogs and cats. Animal & pet loving Americans protest dog and cat mistreatment by VA research departments. Yet, ignore that which is done to live human beings?! That attitude makes you the problem more than the Nazis, and is what the whole holocaust and American genocides were about: people like you turning deaf, dumb and blind to one of the worst human genocides of the 20th century! VA PR claims that, "VA is not responsible for ***all*** veteran suicides..." Readers that is a weasel statement and red herring diversion away from the fact that *VA is responsible* ***at*** **all**! **VA is accountable.** I say VA is culpable for over 99% of them and the post hoc statement using ***'all'*** in addition to aforewritten denying onus, ***is admission of its guilt straightaway!*** VA and its civil service employees know full and well the evils that they do; however, one must go through that hell-hole & meat-grinder, first hand to fully understand what I write here. In doing so s/he is in the bowels of a monster; I did so and lived to warn others about my experience. Very few active duty US soldiers these days are not drugged in some way to help s/he undergo the mental and emotional stress of doing their jobs. Especially those in a war theater. Drugs extend human endurance in adapting to inhuman conditions. However, the cost for doing so is extremely destructive and permanent! That was common over 40 years ago when I served. Neuro-

poison drugs then were fewer and less deadly than today's neuro-toxins. But served the same purpose squeezing out of us every bit of human resource as it is doing now. Repeated deployments, frozen enlistments and such break down a human in Toto. Pumping s/he up with drugs to keep the machine going? Yes, that is very old news! Spectator sports uses it as does every other endurance taxing endeavor, and has been doing so for decades! What makes anyone think US military would not stoop to that in making a super-soldier? Pollyanna Wallflower Amerika are you really that mentally null and void to not realize what is going on? War takes a toll; humans break down. Problem in throwaway Amerika is when used up the GI & veteran goes to the dump as human garbage like everything else this nation wastes. Keep enjoying your free ride, lunch and sucking the sugar tit, Amerika for it comes to an end, I assure you of that! Furthermore, aforewritten information is in a GI's medical records and VA uses that against lab monkey veterans in the most sinister of experiments. Especially as retaliation against insubordination in ways that not even Hitler's Nazis imagined. First thing VA does is drug the hell out of newly enrolled veterans. Any who are misperceived as IP or **Identified Problems** get extra special mistreatment. I am an IP. When VA used one of its myriad dirty tricks to deny benefits by setting me up as a 'no show,' default, denial, I contacted the US Veterans Affairs Secretary's office and he took it up. That forced local VA to conduct the review and admit me into their criminal system. '***We will do this but you will pay dearly,' said VA.*** And I have done so at every turn. Getting anything except grief from these people has been pulling chickens teeth until circumstances again allowed firing the agency and returning to private sector healthcare. One glaring tip off that I was "Flagged' is watching an employees face. One learns much about the evil nature of bureaucrats just in studying them. Her demeanor completely changed once my records were up on the computer monitor from original approach and mutual courtesy greetings. Then one would have thought I called her mother something that procreates and hides in an underground lair. The mistreatment went further south from there. Then came rude behavior more head-games. Gaslighting is a VA favorite, which is a very cruel and sinister method of making the target think s/he is losing their mind. The game is also very simple and easy enough for any moron to remember and play. Messing with a person's reality causes confusion, uncertainty, self-doubt and worse. Now when drugged beyond reason, even after having reported negative side effects from those drugs – which staff ignored, dismissed and/or minimized – the psychiatric effect of head-games became deadly. I had employees tell me one thing on the phone to then in person deny it; gaslighting, one-on-one and convenient memory is a favorite among head-game players. Having witnesses with one, which VA staff vehemently discourage for obvious reasons, stops that because now two people witness their behaviors. I suppose those fools never figure that recorded phone calls work both ways, too. VA is a matriarchy run by misandrist employees; essentially a restaurant run by waitresses. Nursing is a vocation like a diner waiter or waitress. A nurse is nothing but a clinic or hospital ward waitress. VA uses them in place of qualified staff. Why? First, because they are cheap and easy imports. Second, because VA cannot hire qualified managers and medical staff, it uses whatever is cheapest and expedient in its training facilities. Nurses, doctors, etc with anything else going for her are employed in the private sector not working in the worst healthcare system in America as a inexpensive, glorified, desk clerk and waitress. But calling Ms. Misandrist out was not the point. Maintaining my head in pinpointing what was going on for my reference only was reason to digitally record anything beyond handwritten blue or black ink on paper records, which hold up in civil and criminal tort whether one is alive or dead – veteran readers hint, hint, hint. I did challenge a VA employee who said one thing a day before then denied it the next. She became aggressively, hostile and defensive...proving her guilt right away. Thanks lady for the confirmation of what is going on here that I later documented handwritten on paper...once again veteran readers hint, hint, hint. The last act before firing and leaving VA was undergoing MHC torture aka 'therapy session' in a local VA clinic back office. The point of it is to tip a troubled veteran, especially when drugged,

into suicidal psychosis before releasing him to finish the self-murder. Ms. PhD psychologically tore me apart in forced, impromptu 'therapy' that clearly is defined as psychiatric abuse by US Psychiatric Association and many other institutions actively monitoring this ongoing *criminal* activity. That and many other agencies strongly urge people who have undergone such torture to immediately report the evildoing!! Seems these mad doctors and/or wannabes, such as those at the VA, are giving MHC and Big Pharma industries a very bad rap. Abusive therapists and prescription drug prescriber's, using these vehicles to commit mass murder. Most drug prescriber's especially those working at VA – totally out of employee laziness to read them – remain clueless of ***black box*** and other grave warnings that come with prescribing and using these drugs! Having insane, loose cannons in the treatment field combining these deadly neuro-toxins with reprehensible mistreatments slaying people is ruining Americas MHC image, which at VA is an understatement. ***VA, stop murdering our veterans with drugs & suicide.*** Fortunately, I had already stopped taking the psychotics well before the ill fated moment with Ms. PhD. In my opinion, she needs to return home; for, her village is missing its idiot. For my unforgivable sin in being '*non-compliant*' and '*insubordinate*' refusing to take harmful drugs, a VA quack MD placed a 'do not treat' flag on my records as punishment. The agency has a penchant for compiling secret lists of things and 'do not treat' is only one of them. VA has many such atonement's for the millions of possible sins a veteran can commit against its white coated 'gods, goddesses' and the lesser wannabe quacks that strut around mimicking them. *Readers, that is a Socialized, government run, healthcare and benefits system. VA is a Socialist organization in Toto. Neo-liberal or National Socialist facets in USA are shoving this down your throats with similar swill while you doze fat, numb and dumb under bread, wine and circus tents*. To continue, after the back-office terror session with Ms. PhD, I was in a depressive fog for months cycling between suicidal ideation and brink of attempts. Had I of been on psychotic drugs, I would have never made the drive home, and cause of suicide would've been another traffic fatality from speeding and hitting a 10-foot diameter, steel reinforced, solid concrete, bridge column at 110 MPH dead on without seat belt. I went so far as to unbuckle with the intent of doing so before sanity regained control. Just like two of my fellow veteran mates who suicided that way. DPS would've had to scoop what was left of me out of the tangled mess as it did them. VA would have committed another almost perfect crime rewarded by more unspent millions in suicide prevention budgets from numb-nutted elected lootership in Washington DC. VA and her friends grow richer while veterans & Americans grow poorer. By the time I came out of that 'fog' and reasoned out what happened there is no doubt that **US Veterans Affairs is purposely murdering veterans by suicide.** ***VA owns that in Toto!*** Another valuable reason to journal is a ledger is solid history of what happened as puzzle pieces to assemble into a composite Big Picture as I have done for readers. Connecting the dots as it were. If I would've died on the way home from visiting with Ms. PhD, my family and their lawyers would have assembled the puzzle from that legacy – *hint, hint, hint to veteran readers and families.*

24 documented cases of veterans dying by suicide ***on VA campuses*** during an 18 month span from 2017-2019. They died in VA clinics, parking lots, cemeteries and other places ***on VA property*** while actively undergoing VA MHC. No doubt the reason: protesting mistreatment and proclaiming to the world that VA and her agents are killing us by suicide. Furthermore, far more undocumented and/or under-documented and censored cases exist. Wrongful death lawsuit settlements to bereaved families because of these suicides surpasses 1 billion dollars and continues shooting straight up. Winning malpractice and similar suits against VA quacks, ditto: straight up! Socialist mass media remains quiet about these atrocities going on in Socialist USA. Why? Two of the onsite veteran suicides were via self-immolation. One sees similar protests in ***Socialist*** Soviet Russia, BTW that state is ***not***

communist! ***USSR*** stands for United Soviet ***Socialist Republic, and BTW Nazi is not fascist! It is National Socialist.*** Red Square protesters in Russia and Tiananmen Square protesters in Communist China routinely via self-immolations staged openly tell the world about human rights tyrannies in those countries! US mass media broadcasts the tragedies in 'we the sheeple's' faces pointing out other country's dirty laundry. While it hides and censors the vilest, stinkiest pile of it right here in the homeland named US Dept of Veterans Affairs! Meanwhile fat, numb and dumb Americans sleep on content with myth of the Great American Dream. Seems everyone except they knows one must be sleeping to believe it. BTW – **America was not formed as democracy but as a Republic, which Soviets copied when forming that nation, among worse things such as the longest, bloodiest genocide in human history, which occurred on American soil. The near total extinction of Native American Indians and the Buffalo!** ***Doubt that if you've the guts look it up. Seems the tradition continues in Nazi organizations such as VA and BIA, until it gets around to mainstream Amerika...that means you, your kids and descendants dear readers. Famous last words of 'that will never happen here' or 'will not happen to me' are just that! Your last words. They always dispose of useful idiots with no place to run – dead, last.***

First They Came
First they came for ~~Native Americans-~~
Next they came for the ~~Jews-~~
Then they came for ~~Soldiers and Veterans-~~
When they came for you and me-
No one remained to stand and fight for you or ~~me-~~
If you will not join with us now-
When your time comes who will stand with ~~you~~-
Always remember that they dispose of useful idiots with no place to run ~~dead-last.~~

How many ways can Veterans Affairs employees murder a veteran? Let us count them!

Veteran murder by VA staff has been ongoing for over a century. Secrecy covered up these crimes from public knowledge; plausible deniability gives Washington DC a convenient excuse to claim *we did not know*. In other words hiding behind convenient, willful blindness. In that flavor, both houses of Congress throw more reward money to VA for each veteran suicide; in telling it great job keep murdering them for us so we don't have to tell taxpayers the true cost of these ongoing wars that we wage to feed our friends and our campaign, soft money, Swiss bank accounts. VA cries alligator tears all the way to their Swiss bank accounts while thinking of new ways to keep this moneymaker profitable. Only America and VA can stoop this low in the cesspool profiteering from an ongoing veteran suffering and suicide epidemic. Party smile everyone waving old glory and hypocritically parroting - ***$$$In$$$god$$$we$$$trust$$$.*** However, now veterans, their families & lawyers and courageous 'lighthouse' VA employees speak up and out about this national, disgraceful, inhuman, mistreatment! Some people simply cannot live floating in that much raw sewage infecting their conscience and souls. So the lighthouses or messengers clean them by speaking out warning others to beware this evil.

Let us review only a few ways that VA patriotically murders our veteran ***kin***. Death by criminal malpractice; intentional, sadistic malfeasance; oops while under a surgeons knife; oops while on the operating slab; death by poisoning via prescription drugs; death by neglect in its pest-house facilities; death by pests such as veterans stung to death by fire ants or eaten alive by vermin while confined to a

VA hospital bed; death by untreated intentionally caused hospital and clinic infections and chronically filthy conditions; outright, intentional mass murders: see Clarksburg W. Va, VAMC murders by one VA staff nurse who pleaded guilty to only 7 out of 21 or more veteran homicides that she committed in that hospital. The '***gag me with a spoon***' drama ended in a publicly broadcast, kangaroo court, in another VA, TV game show episode to appease the public. This comic operatic, dog and pony circus, distracted media attention away from far worse agency crimes. Thus, serving as a proverbial red herring amusing the hounds away from a mass murdering foxes trail. Washington DC and VA expected the public en masse to believe that nobody in that entire hospital knew this had been going on for years, and that nothing about it was fishy? This whole thing reeks of a VA – mass fish kill, and nothing can cover up that much stink!! Typical standard practice for US Dept of Veterans Affairs Inc, – a US Government Company!

America is a land of phonies and slacktivism is only one facade. Dressing up in an ***'I'm so cute or I'm such a bad-ass in this outfit'*** to do 22 push ups prissing around in a social media selfie is nothing but show-off slacktivism that is causing more grave harm. ***In other words, slacktivists – YOU and your useless egoic tokens are the problem!*** You are shilling VA propaganda while frottaging each others egos. The agency plays bingo card games with Vet suicides! Today it is 22, last week was 18, tomorrow will it be 20 again? Who knows what numbers this gamely agency will pull out of its ***cooked-books pie hole*** to entertain Americans! States such as Texas have the highest veteran suicide rates in America. VA uses a '1 to 5 star' quality rating system for its facilities; where 5 is best and 1 the lowest. A 1 star rated facility simply treads black water, in just barely floating on the surface with other BS, before from sinking lower into contents of the VA cesspool as neighbor to the whale turds. That 1 star rating of Texas VAMC reveals many sins about this bureau, and the nation's highest, veteran suicide rate, is only one on them!! VA's answer? Do not use those facts in its funny number, skewed, bingo game. It cannot have truthful information messing up VA's ponzi scheme. Therefore, slacktivists you are nothing but useful idiots in spreading those inaccurate, red herring, stinky-fishy, numbers! You are nothing more than a circle-jerk mix of Keystone Cops and 3 Stooges, pretending to be little 'emperors and empresses' while wearing no clothes showing off your little 'willies' to the world. You are diverting national attention and resources away from true causes of why daily 100 veterans die by suicide. Reason? We are not getting needed care from felonious VA and an ingrate, narcissistic Amerika. Therefore, with distractions such as your ***bring in the clowns hit parade***, proactive, corrective action helping sick and dying veterans is impossible. Slacktivism feeds status quo gravy trains supplying your free ride and lunch while sucking on a comatose, US taxpayer, sugar tit. Veterans keep dying while sending America an SOS message that we need real help, are not getting it, and never have. VA and its employees, friends, cronies and Congress keep growing healthier & wealthier while a phony, slacktivist, Amerika sickens more in spirit and resources showing off their 'little willies.'
